Dear Students, Families, Staff, and Community Members,

The district’s strategic plan for 2018-2021 is focused on two central tasks:

• Attracting and retaining students by providing the educational experiences they and their families want
• Creating a culture where outstanding teaching and leadership is valued and supported

This focus on rebuilding and strengthening Christina will guide our collective efforts in the coming years. This focus also reflects our commitment to people—the students we are helping to prepare for the future and the families, educators, and community partners we rely on to make it possible.

When I first began as Superintendent in the district, I spent time listening to students, parents, teachers, and our partners. I heard about achievements, large and small, happening in our schools every day. I learned about our students’ aspirations for the future and how we need to support them in a rapidly changing world. With this input, we began developing the Strategic Plan. We began with the vision and goals the board had established. We organized Working Groups comprised of community members, parents, and staff. The Working Groups diligently developed detailed recommendations in key areas, such as teaching and learning, school culture and climate, and facilities. We integrated feedback from student focus groups, school leaders, the board of education, and PTA members. We hosted community meetings to review drafts of the plan and also included that feedback.

From these many voices, we identified common themes, synthesized ideas, set priorities, and laid out an actionable plan to be implemented over three years. I am proud of the strategy and the process we followed to create the Strategic Plan. I thank the many people who shared their time and experience. Most of all, I look forward to ongoing engagement with the community and working together to lead our students and schools into the next decade.

Sincerely,

Richard L. Gregg
Superintendent

Together, educating every student for excellence
Our Strategic Plan reflects two central tasks: attracting and retaining students by providing the educational experiences they and their families want, and creating a culture where outstanding teaching and leadership is valued and supported.

This plan is supported by three pillars: academic programs, a learning-centered culture, and processes to empower people. These pillars sit on a foundation of facilities and infrastructure, and are shared using communications that engage us and our community.
The academic achievement and success of students is our most important goal and is the ultimate reason that families and students enroll and stay in our schools. Our academic programming plan is designed to help students reach their aspirations and close academic performance gaps in all schools in the district.

The culture of our district influences learning and growth and shapes the relationships families, students, and staff have with one another and with the district itself. The most efficient processes streamline service and leverage technology so that users are empowered, technology is available to all, and data is accessible. Our plan improves operations to support academics with a focus on students, families, and staff. We are also investing in a change management and project management function to oversee the implementation of the strategic plan.
Our plan for facilities prioritizes safety, instruction, and aesthetics, in that order. Parents and educators agree that first and foremost our schools must be safe places. They must also be places that foster learning, instill pride in our community, and reflect our investment in our children.

The success of the strategic plan will be measured in many ways. The most important will be how prepared students are academically. We set academic key performance indicators based on the District’s commitment to meet the goals of Delaware’s ESSA (Every Student Succeeds Act) Plan that was approved by the U.S. Department of Education. The goals will reduce the non-proficiency rate in reading and math by 50% by 2030. We seek to exceed these benchmarks.

Another important measure will be overall enrollment in our schools, with a goal of reversing declining enrollment trends.
The Christina School District would like to thank all students, faculty, staff, and community members who participated and contributed to this Plan through committees, workshops, focus groups, web input, and planning meetings. In addition, appreciation is extended to the following groups for their active and continued participation throughout the process:
